AUTUMN 2020 - SPRING 2021

## CURL UP WITH A FIVE QUILLS BOOK

At Five Quills we believe reading should be fun and that humour and lively illustrations are key to developing lifelong readers.

We are passionate about creating stories that open children's worlds, inspiring curiosity and wonder. This is why our high-quality picture books and young fiction titles for children aged 3–9 years have well-crafted, action-packed stories at their centre, integrated with engaging, imaginative pictures throughout.

### Don't miss our new titles!

Meet Bug Belly, an intrepid and greedy frog whose quirky antics will tickle your funny bone and capture your imagination. This brand-new series of laugh-out-loud chapter book adventures is perfect for building reading confidence.

At Five Quills we also take great pride in introducing readers to the fascinating world of science from a very young age. Our new eco-adventure series *Lottie Loves Nature* and the extremely successful *Al's Awesome Science* books draw in young readers with humorous stories about friendship and family, and fun, hands-on experiments that they can easily do at home. Lottie and Al encourage children to explore the natural world and help them understand that science is not confined to the classroom – it is everywhere!

This year the environment and finding ways to inspire children to help the natural world have been greatly on our minds. We are therefore thrilled to announce the release of our new eco-adventure series *Lottie Loves Nature*. Lottie is determined to save the wildlife in her back garden, one step at a time. Her detailed scrapbook with nature observations and step-by-step activities empower young readers to do the same – because every little thing matters!

## PRAISE FOR THE SERIES:

### Summer Reading Challenge selection 2018, 2019 & 2020

"Packed with scientific facts, but perhaps more impressive are the examples of some key scientific methods and capabilities (close observation, investigating and problem solving, being systematic and discriminating) and scientific attitudes (curiosity, persistence, exploration, sustained thinking). Working together, the twins devise some ingenious and messy experiments."

– THE SCHOOL LIBRARIAN

"The perfect book to bridge from picture books. There's plenty of fun illustrations between the pages and a simple fun story. What's great though is how likeable the twins are – there's no attempt to make them outrageously wacky – and how they are so interested in science and nature."
